M2:Practical – VI

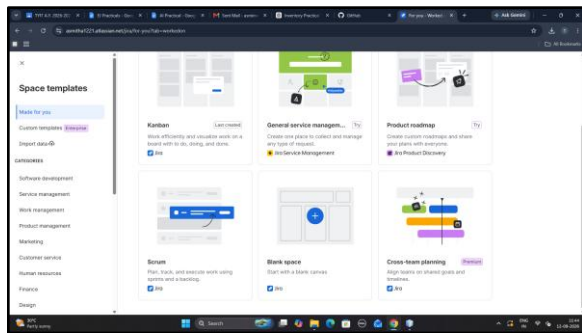

Roll No.: T002	Name: Asmitha Mohan Raj
Class: TYIT	Batch: 1
Date of Assignment: 12/09/2026	Date/Time of Submission: 12/09/2026

6-A: Create and Configure Scrum Board

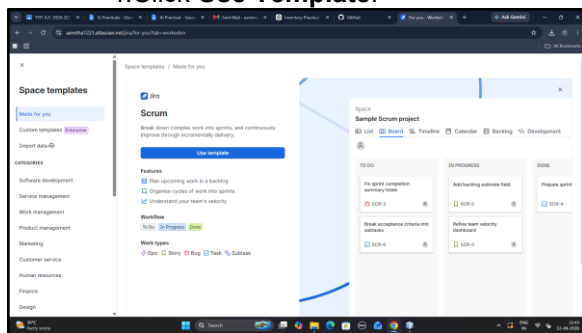

Theory

A **Scrum Board** is a visual tool used to manage and track work in a Scrum project. It helps the team organize tasks, monitor their progress, and manage work through different stages.

1. Open **Jira** and log in to your account.
2. Select **Create Space/Project**.
3. Select the **Scrum** template.

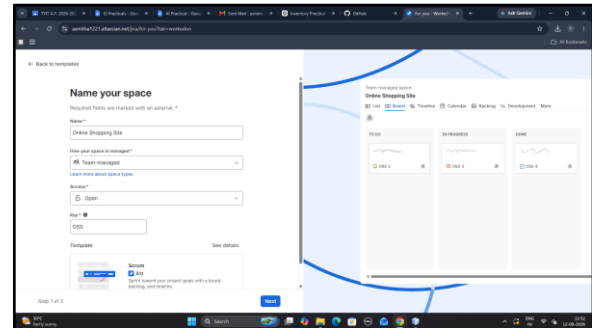

4. Click **Use Template**.

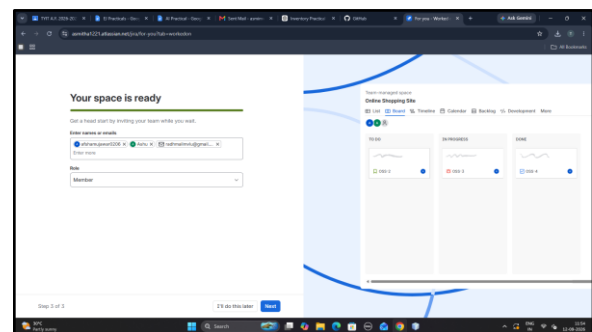

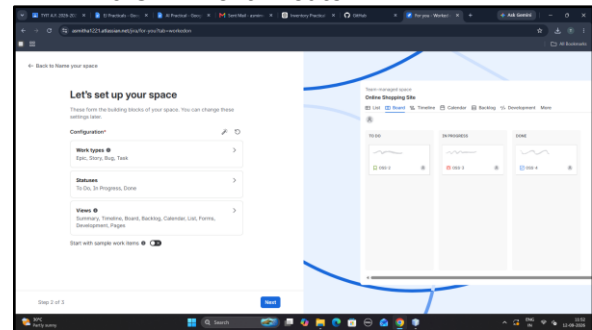

5. Enter the required details such as:

- Space/Project Name
- Management type
- Access
- Project Key

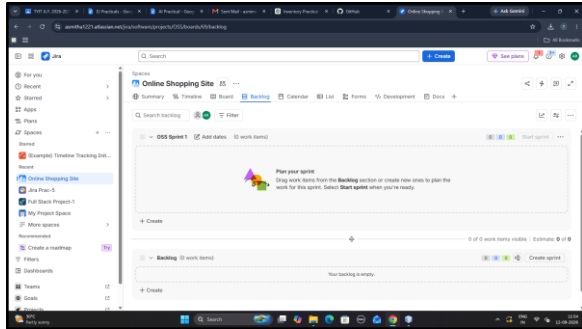

6. Click **Next/Create**.

7. The Scrum Board/Dashboard will appear.

8. Configure the board according to the project requirements.

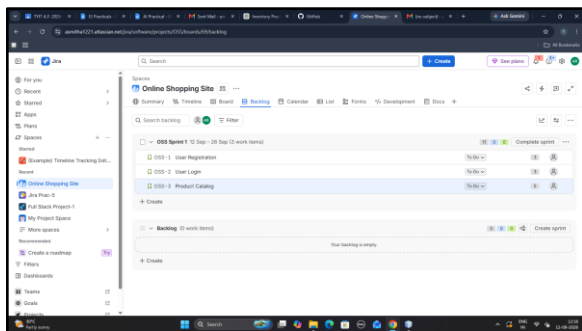

6-B: Create and Start a Sprint

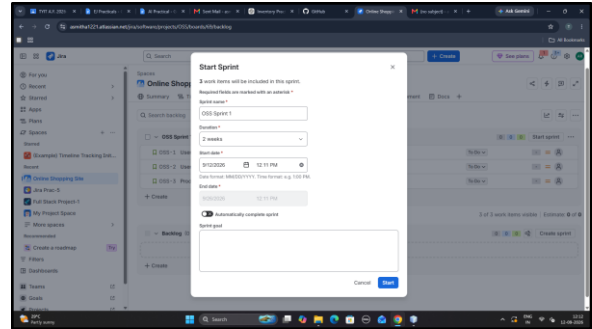

Theory

A **Sprint** is a fixed time period in Agile Scrum during which a team completes a planned set of tasks or user stories.

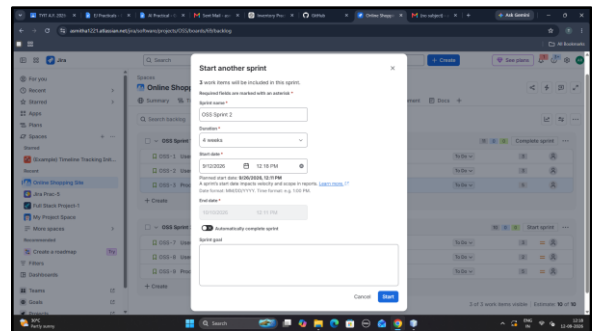

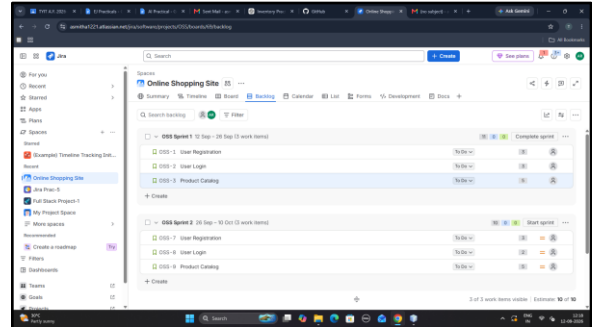

1. Open the **Scrum Board** in Jira.
2. Go to **Backlog**.
3. Click **Create Sprint**.
4. Add the required tasks/user stories under the Sprint.
5. Add the following issues

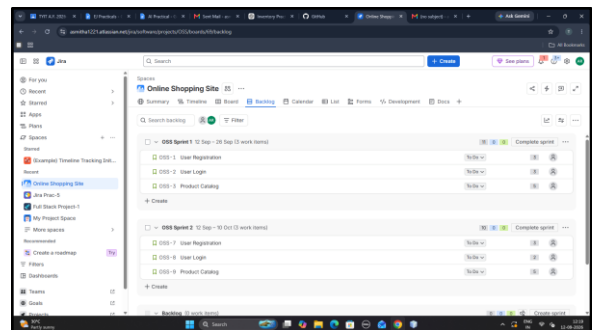

6. Assign the appropriate **Story Points**.
7. Click **Start Sprint**.
8. Enter the Sprint details:

9. Click Start.

10. The Sprint will become active and the tasks can be managed on the Scrum Board.

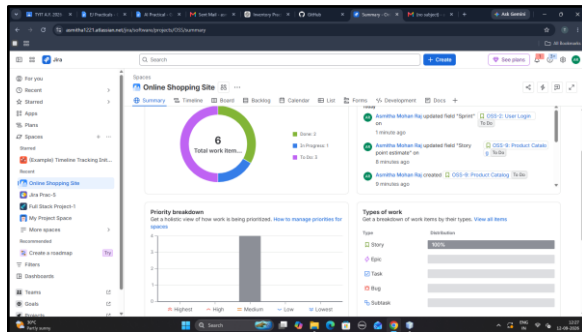

6-C: Complete Sprint and Generate Sprint Report

Theory

A **Sprint Report** provides a summary of the work completed during a Sprint. It helps the team analyze completed and incomplete issues and understand the overall Sprint progress.

1. Open the **Active Sprint** in the Scrum Board.
2. Move the tasks through the required stages:
To Do → **In Progress** → **Done**
3. Complete the planned tasks.
4. Click **Complete Sprint**.
5. Confirm the completion of the Sprint.
6. Go to **Reports**.
7. Select **Sprint Report**.
8. View the Sprint summary and progress.

9. Check the completed and incomplete issues.

10. Take a screenshot of the Sprint Report for practical documentation.
