M2:Practical – II

Roll No.: T002	Name: Asmitha Mohan Raj
Class: TYIT	Batch: 1
Date of Assignment: 02/09/2026	Date/Time of Submission: 02/09/2026

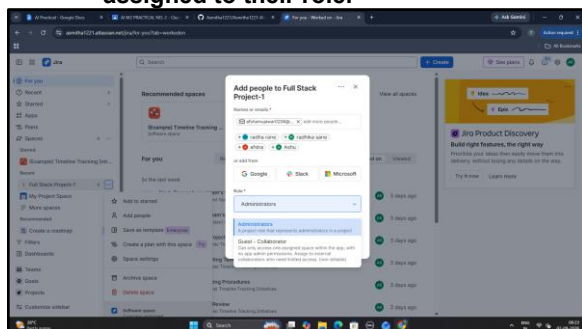

A : Add Team Members:

Team Members are the people who work together on a project. In Jira, team members can be added to collaborate, create issues, update tasks, and track project progress.

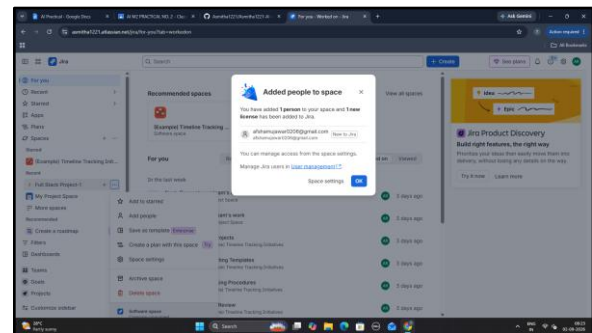

1. Open Jira and log in to your Jira account.
2. Open the required project in which you want to add members.
3. Go to Project Settings from the project menu.
4. Select the People or Access/People option.

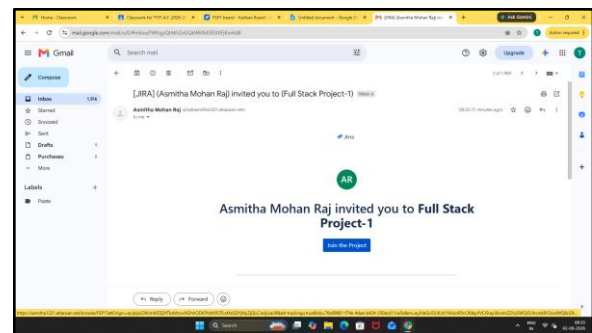

5. Click on Add People or Invite Members.
6. Enter the name or email address of the person you want to add.
7. Select the appropriate project role for that member.
8. Click Add or Invite to confirm.
9. The added member can now access the project according to the permissions assigned to their role.

10. After adding people you will get a confirmation pop-up.

11. After adding the people they will receive their invite in email.

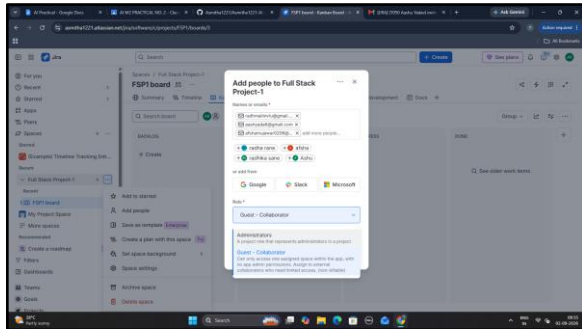

- **Project Settings:** A section used to manage project configuration, members, roles, and permissions.
- **Invite:** The process of giving a person access to join a project.

B - Assign Roles:

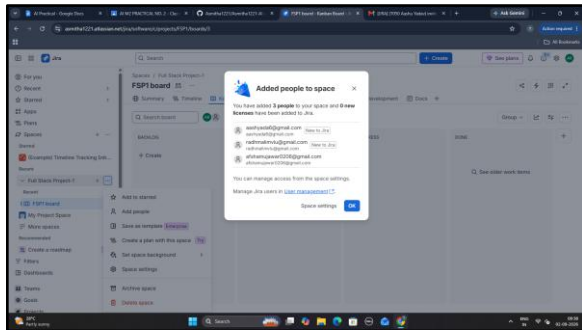

Roles define the responsibilities and level of access given to different team members in a Jira project. Assigning roles helps organize the work and control permissions.

1. Select the People or Access/People option.
2. Click on Add People or Invite Members.
3. Enter the name or email address of the person you want to add.

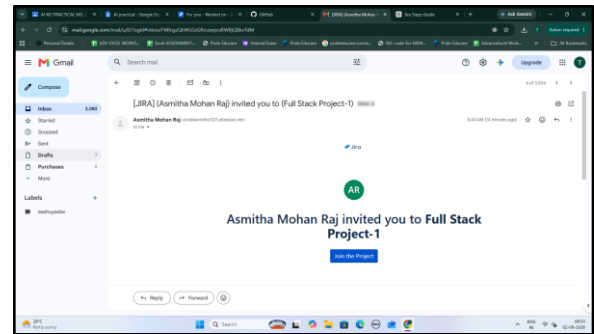

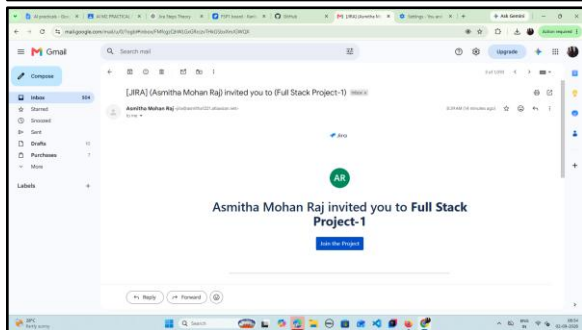

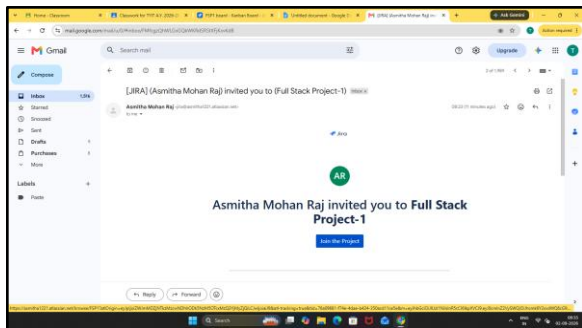

4. Select the appropriate project role for that member.
5. Click Add or Invite to confirm.

6. The added member can now access the project according to the permissions assigned to their role.

7. Screenshots of team members:

Common Roles in a Project

- **Administrator:** Manages project settings, members, permissions, and other administrative activities.
- **Project Manager:** Plans, organizes, and monitors the overall project.
- **Developer:** Develops and implements the software or application.
- **Tester:** Tests the application and identifies errors or bugs.
- **Reporter:** Creates and reports issues or tasks in the project.
- **Viewer/Member:** Can view project information based on the permissions provided.

Important Terms:

- **Role:** A set of responsibilities assigned to a team member.
- **Permission:** Authorization that determines what a user can view, create, edit, or manage.
- **Administrator:** A user with higher-level access to manage project settings and users.
- **Access:** The ability of a user to enter and use specific features of a project.
- **Issue:** A task, bug, story, or other item of work that is tracked in Jira.
